- **Languages:** JavaScript, Ruby, TypeScript, Python, HTML, CSS.
- **Frameworks / Libraries:** Rails, Node.js, Angular, React, Bootstrap.
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools / DevOps:** Git/GitHub, AWS, CI/CD, Docker.
- **Testing:** Karma, Jasmine, Jest, Supertest, RSpec, Postman.

Experience:

Forcast. — Full-Stack Software Engineer (Intern)

Nov 2024 – Apr 2025

Stack: Node.js, Angular, PostgreSQL, Web3, Smart Contracts, CI/CD

I joined the development team to support the evolution of the MVP decentralized investment platform. My main role was implementing specific functionalities assigned via tickets (Jira), notably developing the hybrid multi-login system. On the frontend (Angular), I developed UI components such as dashboards, filters, and pagination systems to improve data visualization. Additionally, I performed bug fixes on Node.js endpoints and created technical documentation for project deployment and onboarding new developers.

Cuatro Coigües — Full-Stack Web Developer

Sep 2019 – Apr 2022

Stack: Ruby on Rails, Puma, AWS, PostgreSQL, jQuery, Webpacker, Bootstrap

I collaborated on the development and maintenance of the company's first digital sales channel. My role focused on the direct implementation of backend and frontend functionalities, as well as integrating services such as payment gateways (Flow) and marketing tools (Mailchimp) via APIs. I supported the operational configuration of AWS instances and the resolution of daily incidents, documenting technical processes to facilitate business continuity and the subsequent platform migration.
